Engineered For Performance

INFILTRATOR
water technologies

Quick4 PLUS CHAMBER SYSTEMS

- Two center structural columns offer increased stability and superior strength
- Advanced contouring connections
- Latching mechanism allows for quick installation
- Four-foot chamber lengths are easy to handle and install
- Supports wheel loads of 16,000 lbs/axle with 12" of cover

ATL by INFILTRATOR

The ATL system is a sand-lined treatment and dispersal leachfield system consisting of 6 components.

- Produces Class 1 (EPA secondary) treated effluent
- A passive advanced leachfield treatment – no moving parts or power required
- Modules are quick and easy to install
- Shallow system maximizes site suitability and reduces amount of sand fill required

INFILTRATOR tanks

- Strong injection molded polypropylene construction
- Lightweight plastic construction and inboard lifting lugs allow for easy delivery and handling
- Structurally reinforced access ports eliminate distortion during installation and pump-outs
- Reinforced structural ribbing and fiberglass bulkheads offer additional strength
- Can be installed with 6" to 48" of cover

EZSNAP by INFILTRATOR

Click and Lock Riser Technology

Create an easy-to-assemble watertight riser system for septic tanks, pump tanks, and cisterns. Click and lock system eliminates the need for assembly tools.

- Easy to Assemble
- No Tools or Adhesive
- Watertight – Gasketed Connection
- Nest Together for Efficient Shipping
- Available in 2, 6 and 12 Inch Heights
- Strong, Durable, Polypropylene Construction

On the cover: Lake Guntersville.
Lake Guntersville State Park is the location for the AOWA 33rd Annual Trade Show March 12-13, 2020.

From the AOWA President

Alan Astin
AOWA President

Though it still feels like summer out, we are well into Fall with Thanksgiving and Christmas right around the corner.

The AOWA has several updates that we are excited to share with you.

The 33rd Annual Trade Show dates and location have been confirmed! The Trade Show will take place March 12-13 at Lake Guntersville State Park Lodge in Guntersville, Ala. Within this issue you will find a promotional brochure containing information on the show and places to stay while you're in town. More information and registration forms for the Trade Show can also be found on the AOWA website at www.aowainfo.org.

Helping Hands Across Alabama continues its efforts to assist those in need of septic installations and repairs. We are pleased to announce that anyone who would like to volunteer for an upcoming Helping Hands project, and are **NOT** currently an AOWA member, will receive a complimentary membership for one year. You would be responsible for renewing the membership once the first initial year is up. To volunteer your time and receive this complimentary membership, please contact Abby Burns at the AOWA office at 334-396-3434. We look forward to working with you and appreciate your time and commitment to this worthwhile project!

The 2020 Continuing Education and Licensing class dates and locations have been confirmed and can be found within this issue, along with registration forms for each. You can also find this information and registration forms on the AOWA website.

During the summer you received a mailer asking you to update your contact information, including your mobile number and email address. A copy of this member info card can be found within this issue. Please fill this out and mail it back to the AOWA office. We want to keep all of our members updated on AOWA activities!

The AOWA scholarship application will open in January. Stay tuned for information on this member opportunity.

Tornado relief efforts are still in progress in Lee County. To date we have raised over \$5,000 for the Disaster Assistance Relief Program and the AOWA has matched those funds. We will continue to provide updates as we work to assist in repairing the damage caused by the storm. If you would like to make a donation, please visit the AOWA website or call the office. Every little bit helps!

As always, thank you all for your efforts in keeping the AOWA a successful, supportive association for its members and others in the Onsite Wastewater Industry.

Take Care,

Alan

Polylok wastewater products...
a septic tanks best friend!

Polylok, Inc. has been at the forefront of effluent filter and onsite wastewater technology for over 35 years. With an extensive line of effluent filters, septic tank risers and covers, filter and tank alarms, safety devices, distribution boxes, and an array of onsite wastewater accessories, we are your one stop shop for all your septic tank needs. Trust the company that experts and professionals have trusted for over 35 years!

Visit our web site for our complete line of more than 200 onsite wastewater & drainage products.

www.polylok.com / 1-877-765-9565

News from the AOWB

Greetings licensees!

Fall is here and so is renewal season. Don't forget to renew your license before December 31, 2019. You can renew online via the AOWB website at www.aowb.alabama.gov.

ADMINISTRATIVE CODE REVISION

The AOWB has been diligently working to revise the Administrative Code (the rules) for over a year now. All has been completed and the effective date is November 15, 2019. Revisions were made to better define the current rules. The rules will be placed on the AOWB website after the effective date. If you would like a new copy of the revised rules, please feel free to contact the Administrative office to be placed on the mailing list.

NEW COMPLIANCE OFFICER

I would like to take this opportunity to introduce the newest member of our staff, Mr. Joel Barnes. Joel is the newest Licensing Compliance Field Officer. He comes to the AOWB from the Alabama Board of Pardons and Paroles with an extensive investigative background. Joel will be working the Montgomery South area as well as the Northern half when needed. The hiring committee feels confident the industry will be pleased with the newest employee. The professionalism and attention to detail he exhibits will be an asset to the AOWB.

Please feel free to contact Joel at 334-300-5625.

In Addition to Joel, we are excited to have an additional compliance officer on staff as early as December 1, 2019.

The AOWB officers are busy contacting licensees to schedule appointments with them. I strongly feel their presence is needed in the industry. Building good relationships with licensees is part of their work performance and they are here for you. If you would like to meet with one of our compliance officers, feel free to contact me, and I will forward your information to them.

The new motto for 2020 is:
SEE SOMETHING, SAY SOMETHING.

ATTENTION INSTALLERS!!

Code of Alabama 34-21A-21 states in part that a license can be suspended or revoked for failure to follow the rules and regulations of the State of Alabama Department of Public Health or the appropriate Local Health Department or authorities. It has been brought to the Alabama Onsite Wastewater Board's attention that numerous installers are not submitting the CEP-5's to their Local Health Department. These forms are to be submitted to the Local Health Department within three business days of completion of the system. Please note that ALL installers, (Basic, Advanced Level I and Advanced Level II)

are required to submit this form, and it is YOUR responsibility as an installer to notify the Local Health Department of all installations to include engineered designed systems. As this is a health department rule, if it is not followed, you could possibly have a complaint filed against your license. Remember, keeping a good relationship with your Local Health Department provides a firm working relationship with everyone!

I wish you all continued success in your business!

Melissa Hines
Executive Director
Alabama Onsite Wastewater Board

Septic Tanks • Water Cisterns Pump Tanks • Holding Tanks Rain Water Harvesting

Setting the standards for all other tanks. The Roth MultiTank® offers undisputed best-in-class status and the highest brand recognition of any tank in the market. **The only tank you will ever need.**

Multi Usage

- For water cistern, pump, holding, rainwater or septic tank
- Low profile
- No water for backfilling required

Multi Layer

- Inner layer of FDA approved virgin HDPE, two inside layers of PE for improved stability, plus one outer layer of black and UV-stabilized PE
- 100% watertight
- Strongest & heaviest poly tank on the market

Multi Coverage

- Lifetime* Corrosion Protection and 5 years of Labor Insurance Coverage

BEST TANK. BEST WARRANTY. BEST SYSTEM.

What to Expect When Being Inspected (Conventional Systems)

ALABAMA
PUBLIC
HEALTH

By Public Health Environmentalists Natalie Parsons (Lee and Chambers)
& Ike Bright (Elmore and Lowndes)

Day of Inspection: What do we need from the Installer?

- ▶ Call the Public Health Environmentalist (PHE) between 8:00-9:00am local time to schedule your inspection
- ▶ Have the Permit #, Name, and/or Address
- ▶ Be flexible, the PHE may have numerous inspections in a single day
 - On occasion, the PHE cannot make it to the site and may ask you to certify your installation (CEP5)
 - Allow the PHE 45 minutes past the scheduled inspection time before certifying

Day of Inspection: What installers may need from the Environmentalist?

- ▶ Have specific questions about the installation (site, depth, sizing, setbacks, etc)
- ▶ Unforeseen issues/problems occur during the installation
- ▶ Finish the installation early or are running behind
- ▶ Communication is key

Installer Requirements:

Permit

- ▶ Installer have it on hand
- ▶ Correct version
- ▶ Correct lot/address

Site Plan

- ▶ Most recent version
- ▶ Ensure all required setbacks
- ▶ Structure/plumbing stub-out
- ▶ Correct EDF location

Installation Issues: Call your local PHE

- ▶ If you hit a restrictive layer before you reach the required trench bottom depth: ASHES (gray soil), Rock, Free Water
- ▶ Show up and the lot has been cut, filled, or modified in any way
- ▶ Structure built on top of proposed EDF

Setbacks Ensured: Onsite Sewage Treatment and Disposal, 420-3-1, Table 6

Septic Tank:

- ▶ Tank/s have State Permit
- ▶ Approved manufacturer's number engraved inlet end and specified capacity (*concrete tanks*)
- ▶ Tanks in series, no more than 2. 1st tank in series, no baffle wall
- ▶ Baffle in place (existing or new)
- ▶ Set level
- ▶ Inlet tee in place and sealed
- ▶ Outlet tee/filter in place and sealed; NSF Standard 46 (or as specified) effluent filter installed
- ▶ Risers: Dwellings- no greater than 6" below grade. Establishments- at grade or above

Effluent Distribution Lines

- ▶ Trench widths not less than 18 and not more than 36 inches
- ▶ 5 feet between trench walls (minimum)
- ▶ Trench bottom level. Grade of pipe not exceeding 1" per 100 feet
- ▶ Minimum fill/cover over aggregate/product of 12"
- ▶ Trench depth per permit
- ▶ Gravel
 - Perforated pipe 4" in diameter. Perforations on bottom (no slits)
 - Gravel clean and properly sized. Gravel at least 8" under pipe to top of pipe (min. 12" total)
 - Barrier cover material over gravel approved, ex: Untreated building paper, craft paper, geo-tech fabric (No Plastic/Polyethylene)
- ▶ Standard fittings, connectors, end caps used if required
- ▶ Equivalent Products sized/installed according to reduction
- ▶ Trench Depth
 - Based on professional's/PHESS's soils evaluation
 - Based on restriction and minimum vertical separation (MVS) required
 - Trench bottom shall be no deeper than permitted depth (*Trench depth may influence product/configuration*)
- ▶ Permitted as Gravel or equivalent unless specified by a Professional Engineer

continued...

Washer/Graywater Lines

- ▶ 25% of EDF as gravel
- ▶ EDF can be reduced 25% if washer line installed
- ▶ No reduction in footage for equivalent products
- ▶ Tank not required but recommended

Pumps and D-Boxes

- ▶ Pump sized (hp) according to head necessary to overcome grade and distance
- ▶ Pump chamber sized according to professionals recommendations
- ▶ Distribution box set level, stabilized, outlet pipes rigid, laid level or on equal grade for 5 feet

Level Header

- ▶ Header installed level
- ▶ Header on same elevation as effluent distribution line
- ▶ Header at least four (4) inches in diameter
- ▶ Invert of header at least four (4) inches below invert of septic tank outlet
- ▶ Maximum length of effluent distribution line 100 feet

Serial Distribution

- ▶ Invert of uppermost effluent distribution line eight (8) inches below invert of outlet of septic tank
- ▶ Invert of crossovers at least four (4) inches below invert of septic outlet
- ▶ Undisturbed earthen dam in crossovers
- ▶ 100 feet or less of trench
- ▶ One (1) crossover required
- ▶ For more than 100 feet of trench at least two (2) crossovers
- ▶ Maximum length of effluent distribution line from a tee, not more than 100 feet

Inspection and Approval

- ▶ All requirements of the system checked by the PHE
- ▶ CEP5 required at inspection to attain Approval (*Pink Copy*)

Installer Certification

- ▶ PHE, at times, may ask installer to certify the installation of the system
- ▶ CEP5 must submitted to the PHE within 3 business days
- ▶ Approval given once CEP5 has been received

Further questions can be directed to Natalie Parsons at (334) 314-8599.

Let's Talk Training

*Allen Tartt
AOWA Training Director*

Hello One and All,

My correspondence to you this time around will be brief. The quiet of summer has given way to the hectic fall period, and I find myself on the road much more than I am in the office.

We have one remaining continuing education class for the year at Joe Wheeler State Park on November 21-22. If you cannot attend, there are still opportunities to get your hours elsewhere! You can do one of the following:

- 1) Arrange to take the online continuing education through the University of West Alabama. Call me at 205-652-3803, the AOWA office at 334-396-3434, or visit the AOWA website at www.aowainfo.org. You can find all the information you need within the "training schedule" section of the site.
- 2) Attend a day of one of the licensing classes that are still on the schedule at the Training Center at the University of West Alabama in Livingston. We have one class remaining for Advanced Level II Installer on December 3-5. You can call me or the AOWA office to register. **If you call the AOWA office, be sure to let them know you are only registering for CE credit and not the license so they can open a slot for you to attend.**

You should see a schedule of classes for the upcoming year in this issue. In addition to the usual assortment of licensing classes at the Training Center in Livingston, we will also have classes during the AOWA Trade Show at Lake Guntersville State Park on March 12-13, 2020. Don't miss it! Our other CE classes in 2020 will take place in Dothan on July 9-10, Pelham on September 10-11, Mobile on October 29-30, and back in Livingston November 19-20.

I hope you all have a good fall!

Best Wishes,

Allen

AOWA's Helping Hands Across Alabama

The AOWA would like to announce that **“Helping Hands Across Alabama”** needs your help! If you would like to participate in the upcoming “Helping Hands” projects and are **NOT** currently a member of AOWA, we would like to offer you a free year of membership for volunteering!

What is Helping Hands Across Alabama?

The Mission of Helping Hands Across Alabama is to provide or make repairs to Onsite sewage systems, giving individuals a better quality of life. This program is intended for families, individuals, the disabled, wounded warriors and others with a financial need or living below the poverty level.

All installations of systems and/or repairs of existing systems shall be approved by the Local Health Department and shall be completed per the Alabama Department of Public Health Onsite sewage rules. System products used for the installations as well as the installation of systems are provided courtesy of companies of the onsite sewage industry and licensed installers trained through the Alabama Onsite Wastewater Board.

The AOWA promotes professionalism, good business practices, and offers information on technological advances in the industry through quarterly magazines and continuing education and licensing programs held throughout the state of Alabama.

Continuing Education hours will be awarded to members and non-members for their participation.

The Latest Project

The most recent Helping Hands project took place October 10 in Jackson County, AL for Dustin and Patricia Davis. Dustin and Patricia are lifelong first responders. Dustin is an active volunteer firefighter, while Patricia is an EMT. The two had fallen on hard times with Dustin losing one of his legs to diabetes, and in danger of losing the other. The couple have

continued...

two children living in the home, which was found to have sewage running on the ground. In January, Patricia's mother contacted **Chris Gulley's company, Gulley Construction and Septic Services**, to pump and elevate the system. Chris then suggested the couple apply for the then TRAC program, which is now the Helping Hands program.

Gulley Construction and Septic Services continued to keep the system pumped until the resources and volunteers were acquired. **Greg Richard of Engineering and Surveying, Inc.** performed a perc test at no charge for this project. Greg is also the Engineer Representative on the AOWA Board of Directors. **Lynn Sysco, Head Environmentalist for the Jackson County Health Department**, waived the permit fee and issued a permit to install. **Alan Nipp of Infiltrator Water Technologies** donated the chambers' end caps and a septic tank. **Ed Houston of Houston Excavating** volunteered to do the digging. **Sammy Ray Thompson, a member of the Gulley Construction and Septic Services** team, volunteered his time for this project as well. **AWT Portable Toilets** were onsite on installation day to pump the tank. Materials were purchased through **Wholesale Supply Group**, and two deliveries were made that day after it was determined that a pump would need to be installed. **Alan Bolton**, a contractor out of Dekalb County, was onsite to landscape and sow the grass after the install. The homeowner, **Dustin Davis**, carried chambering during the installation and rerouted his water and gas lines. **Retired 911 dispatcher and electrician, Wayne Shelton**, wired the pump and high-water alarm. Ultimately, the crew installed a liberty pump package for Dustin and Patricia Davis.

As you can see, a lot goes into projects like these, which is why we need YOUR help! If you would like to contribute your services to this worthwhile cause, please contact the AOWA office at 334-396-3434.

All photos shown are from the system installation for Dustin and Patricia Davis.

Legislation Being Prepared for the 2020 Session of the Alabama Legislature

By Stephanie Norrell

McMillan and Associates, LLC

While the 2019 Regular Session of the Alabama Legislature ended just a few short months ago, preparations are already underway for the 2020 Session. The AOWA is currently working on drafting legislation to be considered when legislators return on February 4, 2020. We hope to have these bills prepared and ready to be pre-filed before that time. Pre-filed just means that the bill is introduced and receives a bill number before the first day of the session.

The first piece of legislation we are considering pertains to the Alabama Onsite Wastewater Board and would allow the Board to increase fines and establish a reserve fund. For a number of years, the AOWA has recognized the need for higher fining authority by the Alabama Onsite Wastewater Board in those few instances where the fine should more adequately reflect the severity of the offense committed. Currently, the Board may levy a fine of no more than \$1,000 for each violation. The legislation we are drafting would increase that to an amount that would be more of a deterrent to violations. It would also put us in line with what other boards are currently allowed to fine.

During the summer, the Sunset Committee of the Alabama Legislature recommended that the AOWB be approved for three more years before coming back for review by the Sunset Committee.

During those committee hearings, it was also noted by some legislators that a board with a budget as small as the AOWB should not have to return money to the general fund because it doesn't allow them to build up any reserves for unforeseen circumstances, such as a lengthy investigation and court costs. We are also looking at ways to allow the AOWB to establish a reserve fund and include that provision in the legislation to increase fines.

The second piece of legislation is the septic lid bill. In 2018, the Alabama Legislature passed legislation requiring grease traps to have lids that are designed to withstand expected loads and prevent access by children. The act was named in honor of Sadie Grace Andrews who died tragically at the age of three after falling into a grease trap and drowning in Auburn. We are modeling our proposed legislation after the 2018 bill and will require installers of onsite septic tanks to install secured lids and/or risers to protect against unauthorized access. Pumpers would be required to ensure that a lid is secured or locked after pumping.

As we prepare for the next session, we will continue to watch out for other bills that may affect the AOWA members.

Install / Repair Pump Portable Restrooms Manufacture Tanks

PLEASE SELECT A MEMBERSHIP CATEGORY:

General Membership Category (\$100): General Members include any person, firm, association, corporation, partnership, or other business entity engaged in whole or in part in the manufacturing of septic tanks, or the installation, repair, pumping, servicing, or maintenance of septic tanks or onsite wastewater systems. Membership year is January to December. Membership is for the licensee only. AOWA General Member dues Are \$100.00 per year (Jan-Dec). Membership is extended to those in good standing with the Alabama Department of Public Health. Please note that 25% of AOWA Membership dues is non-deductible for tax purposes.

Associate Membership (\$150): Associate Membership shall include any person, firm, association, corporation, or other entity in the manufacturing, wholesale supply, distribution or sale of components used in the manufacturing, installation, repair or maintenance of onsite wastewater systems. Associate members will not be entitled to vote on business transactions of the association.

Affiliate Membership (\$50): Affiliate Membership shall include any person, firm, association, corporation, or other entity with a common interest in the objects and purposes of the wastewater industry not meeting the requirements for General or Associate Membership (i.e., engineer, technical support, environmentalist, administrator, consultant, etc.) as approved by the Board of Directors. Affiliate members will not be entitled to vote on business transactions of the association.

Please enclose a check or money order payable to "AOWA"
